

Sealing bead

Self-adhesive foamed PUR seal

At the underside of the KDR-BMP enclosure base plates a foamed PUR seal is attached. We now also offer these PUR seals separately for individual applications.

The PUR seal is applied to a carrier film that is self-adhesive on one side and is available in 2 widths. The length is 2150 mm each. The height of the seal results from the respective width. The PUR seal is easy to compress and has very good resilience.

Installing the PUR seal is very easy: remove the protective film, stick it on, done!

Specifications

Material	PU foam
Operating temperature	-40 C° to 80 C°
Properties	halogen free, silicone free

Advantages & benefits

- Very simple and quick installation
- Easy laying around corners
- Very good resilience

Product types & sizes

Sealing bead 6×3,5

Part No.	43347
EAN	4251269332784
Package quantity	1
Length	2.150 mm
Width	6 mm
Height	3,5 mm

Sealing bead 9×5

Part No.	43348
EAN	4251269332777
Package quantity	1
Length	2.150 mm
Width	9 mm
Height	5 mm
