

CCL | Cable clamps / cable clips

for C section rails C30

The cable clamps are characterised by a high clamping range and great flexibility. Ideally suited for strain relief on the C section rail with opening dimensions 16 - 17 mm. It offers flexible clamping ranges from 6 mm to 64 mm. The counter tray is secured by a locking mechanism and cannot slip out of the cable clamp.

The four smallest sizes are also available with a knurled knob for quick tightening or loosening of the clamp. The large, easy-grip knurled knob makes it simple and convenient to secure the CCL without the need for tools.

Also available: sets consisting of EMC shield clamp LFC and matching CCL cable clip.
